

OUR BACKGROUND.

RWASHOSCCO - Rwanda Small Holder Specialty Coffee Company is a farmer owned business that focus on marketing, export and roasting of the Rwanda's highest quality coffee beans. We spent more years working in the coffee farms, selling our coffee indirectly through a long value chain, so we established RWASHOSCCO to help us maintain the standard for every coffee bean and link us to the potential specialty coffee buyers across the world.

To achieve this, among other things, RWASHOSCCO provides farm and managerial trainings to its member small holder coffee farmers cooperatives and ensure 100% profit is sent back for the farms development activities.

We are on a mission to lead the Africa's specialty coffee export sector and increase premium coffee sales to enable us improve not only the lives of our farmers' families but also impact the social welfare of thousands of rural Rwandans.

At RWASHOSCCO, we aspire to become a renowned Africa's from farm to consumer specialty coffee company.

WHY SOURCE FROM RWASHOSCCO?

Our famers work collaboratively with in-house cuppers to ensure every decision made at the farm level is not by chance but rather based on lab results recommendation. And We have made that process part of our living.

We pride to have been born from coffee farmers self-initiative, who tirelessly strive to produce the best of coffee beans in east African region. This sets us apart from the rest of coffee traders allowing us not to require relations with origins because we are coffee origins already. This keep us competitive in the market since it enables us to easily control every step of the bean from farm to package. As a result, we continuously offer high end value products to our customers from the very first trial and on.

OUR FARMERS SUMMARY

CO-OPERATIVE DES CAFECULTEURS DE GISHOMA (COCAGI)

The cooperative was created in 2004 and has about 1,031 members. Its coffee washing station provides jobs for many members of the community, with a workforce of 90 percent women. COCAGI's members come from different administrative sectors, including Nzahaha, the sector recognized for having the highest amount of coffee trees in the country. In this area, the high altitude combined with volcanic soils give a unique flavor and taste to the coffee. COCAGI strives to support other producers, regardless of the amount of coffee they grow. COCAGI has been Fairtrade certified since 2005, and since then we started exporting its certified coffee.

The co-op has participated in Cup of Excellence competitions and is committed producing high-quality coffee year after year.

We produce 100% bourbon cultivar which has a distinctive cup profile of sweet rounded tangerine acidity, morello cherry notes in the aftertaste.

CO-OPERATIVE DE CAFECULTEURS DE HUMURE - COCAHU

COCAHU started as an organization in 2003 and became a cooperative in 2007. All our coffee is 100% red bourbon, fully washed. Youth are mostly involved in our coffee production and see it as a viable income.

COOPERATIVE OF COFFEE GROWERS OF KARABA - KOAKAKA

KOAKAKA Karambi Cws was constructed in 2003 to help members who come from 3 sectors (Kinyamakara, Karama and Rukondo) which are in Nyamagabe district of southern province to generate more income for its members. Our location is an area known as part of high Mountain in Rwanda which all nurtured and ideal land to produce the best quality coffee in the country. In addition, our members are experienced coffee farmers and supply cherries that are fully ripe with greater consistency which results in wonderful flavor of our coffee have been awarded with different prize in the Golden cup and the cup of excellence competition since 2007 (golden cup), 2008, 2010, 2011 and 2013.

The flavor and taste of the fully washed coffee from KOAKAKA Karambi is a result of combined effect of agro-ecological conditions in which our coffees are grown and practices that emphasize on quality processing. Our washing stations is strict in wet processing chain where careful removal of undesirable cherries is done at the reception through two consecutive process first by hand picking and sorting, then through wet immersion of cherries and removal of floating cherries. After the de-pulping and cleaning, a second selection is done followed by a progressive sun drying to end up with one the best coffee profile.

COOPERATIVE ABAHUZAMUGAMBI BA KAWA - MARABA

Abahuzamugambi ba kawa, although we prefer calling ourselves Maraba, is the umbrella cooperative organization that oversees and manages the activities of four coffee washing stations; Sovu, Kibingo, Kabuye and Cyarumbo. The cooperative accounts more than 1372 members of which 56% are male and 44% are female. The coffee producers are from various sectors of Huye district. On average each farmer of the group has 435 trees. Our long-term experience in coffee farming make us the world's first Rwandan specialty coffee.

DUKUNDEKAWA – MUSASA

The farmers of Dukunde Kawa cultivate antique bourbon Arabica varieties, prized for their rich sweetness and subtle expressions of soil, climate, and terroir. The farmers careful stewardship of their trees throughout the year yields heavy harvests of juicy red coffee cherries, which are the starting point for great coffee.

Dukunde Kawa started in 2003 with 300 members; there are now 1176-member farmers in the cooperative, contributing coffee to a total of 4 washing stations, the largest of which being the Musasa station.
